

Balázs László SZEKFŰ

Direct Democracy Online
First Steps Toward Democratic Global Governance

How does technology change political thinking in Hungary? How does Internet-based information consumption correlate to a more refined political taste? What do wiki, social network and open source mean to politics? Is the Hungarian netizen community mature enough for active political self-determination? See how an experiment strives to provide answers to these questions by combining the tools of the Internet and network thinking.

Balázs László SZEKFŰ b. 1972, is economist, entrepreneur, communications expert. PhD student of communication theory at the University of Pécs. Fields: networked information economy, innovation, virtual communities, new media. He is a co-founder of several companies, his career spanned business, academia and government in fifteen years. Balázs Szekfű is a frequent speaker at conferences in Hungary and abroad regarding the advancement of information technology and its impact on society, business and communication. He lectures at universities and writes about technology, innovation and information society issues in the media. His academic publications include “Hogyan keljünk át a 'szakadékon' a mobiltelefonniában?” [How to Cross the Chasm in Mobile Telephony?], in Kristóf Nyíri (ed.), *Mobilközösség – mobilmegismerés: Tanulmányok* [Mobile Society – Mobile Cognition: Essays], Budapest: 2002, and "Virtual Communities in the New Economy", *Harvard Business Manager in Hungary*, 2002/1.
